

2020 DUST CONTROL PROGRAM

**Pottawatomie County Public Works
612 East Campbell Street
Westmoreland, KS 66549
785-457-3631**

In an effort to provide relief from dusty roads to residents of Pottawatomie County as well as improve stabilization and maintenance of County roads, we have established a program whereby residents pay to apply a dust control treatment.

As directed by the Pottawatomie County Commission 2020 applicants will pay 100% of the product cost for dust control.

***The resident's cost for a single application will be at a minimum of 500 linear feet @ \$405.00 then \$0.81 for each additional linear foot.**

Payment must be received in the Public Works Office by *April 1st, 2020
Applications will not be accepted after this date.

Checks will be cashed upon receipt of the application.

Any county resident that desires dust control must complete the request form below and pay the total amount in advance to the Pottawatomie County Department of Public Works. Residents are required to mark the area to be treated (flags, post, etc.) showing the starting and ending points of the application beginning at a specified reference point. ***The total feet of dust control must be continuous per request area, unless within a concentrated subdivision.***

To provide for the maximum effectiveness of the dust control application, dust control will be applied between ***May 1st and July 15th*** based upon weather conditions, availability of the materials, and scheduling as determined by the County.

Pottawatomie County will maintain the roadway, as it deems necessary, regardless of application of dust control. This includes periodic grading.

PLEASE NOTE: The effectiveness of the dust control treatment may vary with weather conditions and traffic and the County will not be held accountable for its performance.
